The European project No One Behind has been advancing in its activities and we have important updates to share!

The purpose of the project is to promote life learning activities and the study of digital competences with low-skilled adults living in rural areas, to improve their professional and private lives

Co-funded by the  
Erasmus+ Programme  
of the European Union

# WHERE WE ARE NOW

## IO2 – THE TRAINING MANUAL

Our Training Manual is now available for download and is available to download in English, Italian, Portuguese, Greek Romanian and Danish!

The training manual aims to contribute to the development of a high-quality training program for adults in rural areas, allowing them to become digitally competent citizens. The training plan and materials work to support adult educators and stakeholders in the development of digital skills of these low qualified adults.

Containing 5 modules that cover 20 digital competencies, the manual is specifically designed to meet the needs of the adult learners, living in rural areas, in terms of their abilities, skills and characteristics. The first manual of its kind, it provides excellent reference materials for not only these adults, but other low-skilled groups, such as refugees, older people or asylum seekers.

The manual has been widely positively received, with one user stating that it is, "A superb resource promoting an issue that many would not have thought existed."

As part of the manual, the consortium provides a catalog of training offer on digital skills available in the countries of the consortium, that can be downloaded here at <https://www.no1behind.org/portal-adrne/uploads/2021/11/NO-ONE-BEHIND-Catalogue-of-training.pdf>.

## International Showcase events

Since the last time, our partners have been busy promoting our Innovative Methodology and our Training Manual. There was no stopping our partners spreading the word about our exciting project. The North East Regional Development Agency, together with Ecoland and EUEI organised the event face-to-face, while Eurocrea Merchant, INOVA and IDEC organised their events online.

## IO3 – No One Behind Boardgame

### Our Boardgame is on its way!!!

A Game-Based Learning technologies and tools will be used to offer a learning experience for adults from rural areas who are willing to improve their digital skills and knowledge, so as to find new work opportunities and eventually improve their life quality.

The game will be based on quiz-like assessment mechanisms, and will test and identify one's level of digital knowledge through knowledge and skills assessment mechanisms. Based upon IO1 and IO2, the selected training methods that will be used will strongly depend on the methodology, whereas the content of the questions/ real-life scenarios/ case studies, etc. will derive from the training manual.

Once online, the Boardgame will be free for the general public to use and enjoy.
